- **Authentication & Real-Time:** JWT, NextAuth.js, Role-Based Access Control, Socket.IO
- **Infrastructure & Tools:** Docker, Redis, BullMQ, Git, GitHub, pnpm, Cloudinary, Figma
- **Practices:** Agile Methodology, Component Reusability, Performance Optimization, Debugging, Team Collaboration

PROFESSIONAL EXPERIENCE

WAFFAQ Solutions Limited — Full Stack Developer (On-site) | Present

- Work as a Full Stack Developer on-site, building and maintaining web applications using Next.js and TypeScript.
- Build end-to-end features across frontend, backend integration, authentication, and data-driven functionality.
- Collaborate with design and backend teams through agile workflows.

Pixel & Code — Full Stack Developer (Remote) | January 2025 – Present

- Develop and maintain scalable web applications using Next.js and TypeScript.
- Build end-to-end features across frontend, backend integration, authentication, and data-driven functionality.
- Optimize application performance, accessibility, and SEO across client-facing projects.
- Collaborate with design and backend teams and manage project planning and task tracking through agile workflows.

TECHNICAL PROJECTS

Guptodhan — Multi-vendor Marketplace | Live Project

- Built a full-stack marketplace with product listings, cart functionality, real-time tracking, C2C classifieds, and B2C service booking.
- Developed Vendor, Service Provider, and Admin dashboards with custom role-based access control.
- Developed and integrated REST APIs, database functionality, authentication, and real-time communication using Socket.IO.
- Led project planning, feature breakdown, task tracking, and data backup processes.

Prime Jewellery — Jewellery Web Application | Live Project

- Developed and deployed a full-stack gold-selling web application where customers can purchase gold in installments.
- Built a commission-based multi-level referral system: each user's referral code lets new buyers join beneath them, so a root account's network grows layer by layer (e.g., 50 members, each bringing in 50 more).
- Implemented the backend, including referral hierarchy handling and commission logic.

Chapaghor — E-commerce / Printing Platform (Ongoing) | Live Project

- Ongoing full-stack e-commerce development covering frontend and backend functionality, API integration, and scalable application development.

ADDITIONAL PROJECTS

Task Management — Full-Stack Task Management Application | Live Project | GitHub

- Developed a full-stack task management application with a deployed live version and public source code repository.

EDUCATION & CERTIFICATIONS

- Bachelor of Business Studies (BBS) — Government City College, Chattogram | 2018–2020
- Level-1 MERN Stack Course — Programming Hero (Batch-10) — Certificate
- Project Management Foundations: Integration — Certificate
